L names = 3
needle groups

Slash Pine

This pine tree has rough branchlets after the needles fall off. It is one of the most popular commercial timber species.

Shortleaf Pine

This pine tree can be found in just one Florida location, a small area of the panhandle.

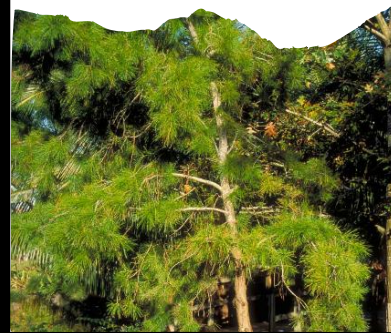

This pine tree thrives with low intensity, frequent fires.

Longleaf Pine

Sand Pine

This pine tree can grow in 100% sand! Young trees have smooth bark and twist as they grow.

Spruce Pine

Older trees have silvery-gray bark like spruce trees. These are only found in North Fl.

This pine tree has tufts of needles growing from bulges on the trunk.

Pond Pine

Loblolly Pine

This pine tree has dull brown cones with sharp prickles
